(—) Drug not tested or drug not indicated.

[1] Moxifloxacin is not recommended for the treatment of UTI.

4% of inpatient Escherichia coli and 6% of inpatient Klebsiella pneumoniae are extended spectrum beta lactamases (ESβL) positive.

3% of inpatient Klebsiella pneumoniae are carbapenamase producers. (KPC)

For ESβL or KPC isolates, discuss or consult with Infectious Diseases department and place such patients on contact isolation.
