(—) Drug not tested or drug not indicated.
[1] Moxifloxacin is not recommended for the treatment of UTI.
7% of inpatient Escherichia coli and 4% of inpatient Klebsiella pneumoniae are extended spectrum beta lactamases (ESβL) positive.
1%of inpatient Klebsiella pneumoniae are carbapenamase producers. (KPC)
For ESβL or KPC isolates, discuss or consult with Infectious Diseases department.
